LEATHERMAN[®]

ABOUT SSL

Southern Supplies Limited (SSL) has come a long way since its humble beginnings in 1982, and is now a major player in the supply of industrial equipment, pipe, valves and fittings, tools, and hardware in the region.

Founded as a family business - and with the aim of being the preferred supplier to the industries we service- our ambition and values have seen us grow into a group of five companies with a reputation for being both trustworthy and dependable. Always aware of our roots, we seek to provide an open and friendly atmosphere when dealing with our customers, while at the same time providing a robust and professional service that caters to the rapidly changing needs of industry.

Our strategic local and international partnerships with some of the world's leading brands, manufacturers and suppliers, together with a dynamic and responsive international supply chain, allow us to fulfill just about any demand that a customer can bring us.

That's why the difference is always **Southern.**

When Tim Leatherman founded Leatherman Tool Group, Inc. in 1983, he set out to create products to improve people's lives. He also knew he wanted to create jobs for hard-working Americans who shared his passion for great design and best-in-class manufacturing.

After 30 years and more than 70 million tools, we're proud to say our one and only manufacturing facility is still right here in Portland, Oregon, employing more than 600 people. We're just as proud to say, in all this time, we've never wavered from Tim's traditions of application driven design, superior materials and detailed finish work. For 30 years we've supported people with products that prepare them for the expected and the unexpected and our community with jobs and growth. Leatherman; Leave nothing undone!

ABOUT **LEATHERMAN**

WHY LEATHERMAN

Tim Leatherman's standards for quality, durability, precision and attention to detail are what make Leatherman tools like no other. Ever since Tim invented the category, they have focused on just one thing - manufacturing the world's highest quality multipurpose tools.

Go to see the various tool tales and testimonials;
